

NEXT GEN THIRSTY THURSDAY

As per By-Law 10.7 MCAM's Next Gen Committee is an Advisory Council representing specific membership groups or groups assigned to a specific task. These Advisory Councils shall act as a means of consulting with the membership as well as provide advice and support to the Board of Directors pertaining to their specific area of expertise. MCAM's Next Gen Committee members consists of these individuals under 40 years old and they meet regularly throughout the year to plan signature events like the Scotch Tasting Night and Ice Fish Derby. Events like these are meant to promote the industry, network and provide educational opportunities that surround new technologies such as BIM and many others.

On Thursday, July 18 at 4:00p.m. The Next Gen Committee hosted their first "Thirsty Thursday Happy Hour" Virtual style to comply with the current COVID-19 restrictions. Members from DMS Industrial, Johnson Controls, BPL and Thermo Applicators logged in to chat and get to know each other and their businesses in a casual, non-formal setting. Cory Gray from Thermo Applicators said "It is great to be connected with the leaders and business owners of the industry, it's not everyday we get to speak with the decision makers and learn from them and each other"

It was a fun way to share a beverage at the end of day!
The next "Thirsty Thursday" is scheduled for July 16, 4pm.
