

October,13 2020 – A Notice from the City of Winnipeg to the Construction Industry

Digital Development Permit Applications

Effective October 13, 2020, the City of Winnipeg has launched digital development permit services. Applications received on or after this date will be reviewed and issued electronically.

To submit a digital development permit application:

1. Review the [digital submission requirements](#),
2. Email your PDF application and supporting documentation to ppd-permit@winnipeg.ca,
3. If requested, submit additional information via [Permits Online](#),
4. Once approved, you will receive your permit via email along with a link to a ZIP file to download your approved supporting documentation.

Note: This additional service is for development permits that are applied for independently of building permits. If your development permit is being processed as part of your building permit application, there is no change to service levels as these applications are already reviewed and issued electronically.

Please visit the [Digital Permit Applications](#) webpage for more information.
