

## Next Gen Wine Tasting November 13th, 2024

The Next Gen Tequila Tasting, held on November 13 at The Kitchen Sync, offered a blend of education, networking, and tasting.

The evening began with a presentation from Rob Boresky, Mechanical Systems Engineer at Efficiency Manitoba, on deep energy retrofits for commercial and residential buildings. Rob covered key strategies, tools, and technologies that can reduce energy use and improve building performance. He also discussed relevant codes, policies, incentive opportunities, and shared case studies on energy-efficient upgrades.

The highlight of the evening was a wine tasting led by Rayna DeBow, sommelier at The Pourium. Guests sampled five wines, learning about each selection and its characteristics.

Alongside the tasting, attendees enjoyed flatbread, salad, and locally made Manitoba beet chips.

The evening ended with a door prize draw, rounding out a successful event that combined learning with casual networking.
