### 2025 Integrated Resource Plan

Manitoba Hydro's 2025 Integrated Resource Plan (IRP) is now available.

The IRP outlines a 10-year development plan to meet Manitoba's future energy needs, based on extensive modelling, analysis, and input from thousands of Manitobans. It highlights near-term actions, lessons learned, and the trade-offs and risks considered in shaping the recommendations.

Members are encouraged to review the report to understand the opportunities and implications for Manitoba's energy future.
