

On January 21st, MCAM hosted the 8th Annual Student Chapter Speed Interviewing event, sponsored by SMS Engineering.

This event aims to provide students with an opportunity to refine their communication skills and build meaningful connections with key stakeholders in the Mechanical Contracting and Engineering industry.

Held at Torque Brewing, this year's event saw ten students engaging in 10-minute interviews with nine interviewers from five companies. The primary goal was to foster networking opportunities, with the hope that some students would be a great fit for employers seeking new hires for their busy summer season.

After the interviews, attendees enjoyed tacos and Torque beers. A big thank you to the companies and students who contributed to making this event a success!
