

The November Lunch & Learn event held on November 23 at the Canadian Museum for Human Rights provided an informative experience for attendees. The day began with networking opportunities over coffee and an engaging exhibit sponsored by DGH Engineering.

The event featured presentations by industry experts, with Blair Mukanik from Manitoba Hydro presenting on their 2023 Integrated Resource Plan. This plan, developed over two years, delves into the key factors shaping the energy landscape in Manitoba and outlines how Manitoba Hydro plans to adapt to these changes in the supply and delivery of electricity and natural gas.

The second presentation, delivered by Michael Anderson from 365 Technologies, focused on "Cybersecurity for the Non-Technical CEO." Anderson offered actionable insights that non-technical CEOs can implement immediately to protect their company's information against threats.

Keep an eye out for the 2024 Lunch & Learns events that will provide ongoing education and networking opportunities for MCAM members.

The Inn at the Forks served as the backdrop for the January Lunch and Learn event on January 18th, 2024. The event kicked off with an exhibit sponsored by DGH Engineering while attendees enjoyed coffee and networking.

H2MB Inc. had the first presentation of the day on the pivotal role of hydrogen in the global decarbonization movement. Delving into green hydrogen production, storage, and distribution, the session unveiled plans for Manitoba's first green hydrogen facility.

The event also featured a noteworthy presentation from the Manitoba Government, outlining the province's commitment to a green economic transition. Attendees received an overview of Manitoba's initiatives and programs aimed at achieving net-zero targets for greenhouse gas reduction.
